

## Foodscaping Volunteer Day Information

Thank you for your interest in Foodscaping Utah! We are excited to work with you on your foodscape! We wanted to let you know a little bit about us and what we do. We are a nonprofit volunteer organization that helps people start growing their own food in their front yards. We believe that growing food is a much better use for our landscape space than pretty much anything else and we want to change the way people think about food and how they look at their front yards.

### Things we do:

- Help you plan your foodscape
- Build raised bed gardens (framed or unframed)
- Fill raised beds or garden areas with compost and topsoil
- Plant food producing plants and trees
- Plant pollinator friendly plants that attract beneficial insects to your foodscape
- Move and spread mulch to places in your foodscape that will not be planted
- Spread cardboard to smother grass or other weedy areas
- Answer follow up questions after the foodscaping day
- Help plan and install drip irrigation
- Work for two hours

### Things we DON'T do

- Move rocks (this includes gravel, lava rock or any other landscape rocks)
- Operate any type of heavy machinery
- Plant ornamental plants
- Remove sod
- Remove existing plants (trees, bushes, perennials, etc)
- Install pavers or any other type of hardscape
